

COMPREHENSIVE EXAM

1. What does a mission statement accomplish?
 - a. It establishes the purpose and values of an institution.
 - b. It shows the institution's compulsion to do things perfectly.
 - c. It puts things off until tomorrow or a later date. d.
 - d. It shows the institution's conscious effort to respect others.
2. You will know that someone in your industry has exhibited unethical behavior if they
 - a. conceal information about products in order to sell them
 - b. price products below competitors to sell more
 - c. stay open longer hours to attract more customers
 - d. advertise their business aggressively to consumers
3. Practicing diplomacy in your career in beauty and wellness shows that you are -
 - a. aggressive and assertive
 - b. motivated and driven to be successful
 - c. emotionally stable
 - d. able to deliver messages in a kind way
4. Your professional image is -
 - a. the impression you project through your appearance and conduct in the workplace
 - b. your ability to control all of the things that clients cannot see
 - c. your ability to become someone other than who you really are
 - d. based on your skill and talent, which gets you to the top
5. A good work ethic depends on all EXCEPT which of the following?
 - a. Motivation
 - b. Integrity
 - c. Enthusiasm
 - d. Hygiene
6. In order to help avoid costly mistakes in the future, it is important that you take all EXCEPT which of the following simple steps in your social media venues?
 - a. Use social media to communicate with peers and clients.
 - b. Emphasize a strong work ethic as well as good hygiene.
 - c. Manage your personal pages or walls.
 - d. Post helpful content.
7. At which of the following interactions is it BEST to determine the client's needs and how to achieve the desired results?
 - a. Client consultation
 - b. Service record
 - c. Client intake
 - d. Total look concept
8. To practice reflective listening, you should
 - a. try to remember what the client requested without actually having to ask them to repeat it
 - b. pretend to listen to the client while actually beginning to concentrate on their styling
 - c. have an assistant listen to the client and then ask them to tell you what the client said
 - d. listen to the client and then repeat, in your own words, what you think the client told you
9. When trying to resolve an unhappy client problem, you should
 - a. find out why the client is unhappy
 - b. politely but firmly argue your points
 - c. tell the client it cannot be fixed, even if you think it can
 - d. strongly assert your opinion
10. If a client starts gossiping, try all of the following EXCEPT
 - a. changing the subject
 - b. talking about the styling you're doing
 - c. quietly joining in on the gossiping
 - d. giving a quick tip for treatment and home care
11. _____ is the #1 cause of daytime fatigue.
 - a. Lack of water

- b. Lack of minerals
- c. Lack of protein
- d. Lack of vitamins

12. Which of the following is the BEST advice when you are feeling sick or under the weather?

- a. Wear a protective mask.
- b. Stay home until you are well.
- c. Avoid shaking hands with clients.
- d. Sneeze into your elbow.

13. The BEST method of prevention for many of the bone and joint pains associated with being a beauty and wellness professional is -

- a. adequate hydration
- b. elbow sneezing
- c. allergy prevention
- d. proper ergonomics

14. Among the safe lifting guidelines mentioned in the chapter, is to.

- a. lift with the back, not the legs
- b. keep feet about shoulder width apart
- c. keep lifted objects a safe distance away from your body
- d. inhale when lifting

15. If you spend the better part of an hour using plenty of soap and warm water to remove all of the visible dirt and debris off of your immediate station and the surrounding area, you will have just done which of the following to your station?

- a. Sanitized it
- b. Cleaned it
- c. Disinfected it
- d. Sterilized it

16. _____ is any methods used to eliminate or reduce the transmission of infectious organisms from one individual to another.

- a. Infection control
- b. Standard precaution
- c. Sterilization
- d. Sanitization

17. Which of the following MOST accurately explains the relationship between direct and indirect transmission of disease?

- a. Neither direct nor indirect transmission require contact with another person.
- b. Direct transmission requires contact with another person whereas indirect transmission does not.
- c. Direct transmission does not require contact with another person whereas indirect transmission does.
- d. Both direct and indirect transmission require contact with another person.

18. What is the difference between respiratory droplets and airborne transmission?

- a. Respiratory droplets do not stay in the air as long.
- b. Airborne transmission involves wetter particles which are therefore less likely to be transmitted.
- c. Only airborne transmission is guaranteed to make individuals ill.
- d. Respiratory droplets are smaller particles and therefore more likely to be transmitted.

19. It is NOT required that disinfectants used in salons and spas must be

- a. virucidal
- b. fungicidal
- c. bactericidal
- d. hypoallergenic

20. The process of disinfection eliminates

- a.
- a very small amount of microorganisms
- b. most microorganisms
- c. all microorganisms
- d. no microorganisms

21. An EPA-registered disinfectant MUST carry all EXCEPT which of the following on its label?

- a. A registration number

- b. Efficacy claims
- c. A contact time
- d. The word concentrate

22. Which of the following is considered contact with non-intact (broken) skin, blood, body fluid, or other infectious materials that is the result of the performance of a worker's duties?

- a. Efficacy
- b. Exposure incident
- c. Standard precaution
- d. PPE

23. If you drop a tool or implement on the floor during a service, you should

- a. immediately throw the implement or tool in the garbage
- b. quickly pick it up and continue, if the client does not see that it was dropped
- c. immediately stop the service and ask your client to come back the next day
- d. either replace the tool immediately or disinfect the tool prior to continuing the service

24. What is the pH scale used to measure?

- a. Levels of carbon dioxide
- b. Overexposure and underexposure
- c. Acidity and alkalinity
- d. Levels of oxygen

25. Hydrogen peroxide should never be mixed with bleach because -

- a. it dries out hair excessively
- b. they become unpredictable in their use
- c. it creates a potentially deadly gas
- d. it "discolors" more than lightens the hair

26. A wire that is not large enough to carry the electrical current passing through it will

- a. electrocute the user
- b. overheat
- c. not power the device
- d. save energy

27. _____ is an electrical safety device that is designed to prevent excessive current from passing through a circuit by blowing out or melting when a wire becomes too hot from overloading the circuit with too much current.

- a. A nonconductor
- b. A circuit breaker
- c. A fuse
- d. An ampere

28. In order to practice good electrical safety, which of the following should you ALWAYS do?

- a. Attempt to clean around electrical outlets while equipment is plugged in.
- b. Twist electrical cords to protect against a short circuit.
- c. Disconnect appliances when they are not in use.
- d. Attempt to repair electrical appliances when they malfunction.

29. What is a condition that prohibits certain treatments called? —

- a. A contraindication
- b. A conductor
- c. A catalyst
- d. A cathode

30. Deductive reasoning is the process of reaching logical conclusions by employing which of the following?

- a. Logical reasoning
- b. Illogical reasoning
- c. Practical induction
- d. A best-guess strategy

31. All of the following are examples of soft skills, EXCEPT -

- a. having good interpersonal skills
- b. having a positive attitude
- c. being punctual

d. having good study habits

32. Which of the following should you focus on as you list former and current positions on your resume?

- a. Duties
- b. Responsibilities
- c. Achievements
- d. Salary history

33. The first reality of a service position is that your career revolves around which of the following?

- a. Your clients
- b. You
- c. Your boss
- d. The general public

34. It is important for you to report all of your income, even cash tips that are not shown on your paycheck, because.

- a. you will get a bigger return on your taxes if you report income that was not included in your paycheck
- b. you will encourage future clients to tip more frequently and more generously
- c. you will increase the value of those tips in real dollars over the long term
- d. you will increase the amount of Social Security benefits you'll receive after retirement

35. If, as a beauty and wellness professional, you are regularly and successfully recommending and selling additional services to your clients, than you have most likely perfected the practice of

- a. retailing
- b. rebooking
- c. ticket upgrading
- d. public speaking

36. As you become more and more experienced, you should see a reduction in which of the following?

- a. The number of clients you see
- b. The amount of time it takes you to perform services
- c. The number of services you perform in a given day
- d. The amount of money you earn

37. The _____ portion of your business plan should include a description of how the business will run administratively.

- a. organizational plan
- b. vision statement
- c. mission statement
- d. marketing plan

38. The _____ portion of your business plan should outline all of the research obtained regarding the clients your business will target.

- a. marketing plan
- b. organizational plan
- c. vision statement
- d. mission statement

39. If you are working on a description of the key strategic influences of your business, including the varied beauty and wellness services you will offer and the high quality you expect those services to be, what, exactly, are you working on?

- a. Your mission statement
- b. Your vision statement
- c. Your marketing plan
- d. Your financial documents

40. Adding services and retail sales to your service tickets means for your business.

- a. additional revenue
- b. additional advertising
- c. additional risk
- d. additional clientele

41. What was the biggest difference between nail technology of the early part of the twentieth century and the later part:

- a. By the later part of the twentieth century, nail technicians were taking color inspiration from movie stars, whereas in the earlier part of the century, they were not using color at all in nail care.
- b. Weekly manicures were not something that people did in the earlier part of the twentieth century; however, in the later half of the twentieth century, their popularity skyrocketed.
- c. In the first part of the twentieth century, nail enhancements used things like acrylic, whereas the later part of the century ushered in much more natural nail care.
- d. Nail enhancements such as acrylic tips, intricate nail art, and UV gel became popular in the later part of the twentieth century, whereas technologies and techniques in the earlier part of the twentieth century were more limited.

42. Which of these is considered a natural nail service?

- a. UV gel nail enhancement
- b. pedicure
- c. fiberglass nail wrap
- d. monomer liquid nail enhancement

43. In order to grow and reproduce, one of the things a cell needs is:

- a. a complete lack of water
- b. the ability to eliminate waste
- c. a supply of hydrogen
- d. extreme cold

44. The chemical process that takes place in living organisms, through which the cells are nourished and carry out their activities, is called:

- a. metabolism
- b. respiration
- c. metacarpus
- d. patella

45. Pressure in massage is usually directed from:

- a. origin to insertion
- b. belly to origin
- c. insertion to origin
- d. belly to insertion

46. As a nail technician, you should understand the underlying structure of the skin, its functions, and

- a. advanced infection control
- b. how to diagnose simple diseases
- c. its basic needs
- d. advanced skin technology

47. What is the outermost layer of the skin?

- a. epidermis
- b. subcutaneous layer
- c. reticular layer
- d. dermis

48. What is NOT a characteristic of healthy skin?

- a. fine grained
- b. rigid
- c. flexible
- d. slightly moist

49. Which of these terms refers to a greatly increased or exaggerated allergic sensitivity to products?

- a. excoriation
- b. corium
- c. overexposure
- d. sensitization

50. Which is TRUE of the difference between dermatitis and eczema?

- a. Eczema appears swollen, red, and hot to the touch, whereas dermatitis appears only as lesions.
- b. There are multiple types of dermatitis, but only one type of eczema.
- c. Eczema is painful and itchy, whereas dermatitis can often appear as a rash-like irritation.
- d. Eczema is not contagious, whereas dermatitis is.

51. On which part of the face is the nail technician MOST likely to experience skin allergies?

- a. lips
- b. bridge of nose
- c. forehead
- d. cheeks

52. A normal healthy nail is _____

- a. soft
- b. dull
- c. white
- d. flexible

53. The lower the water content in the nail, the _____ it becomes.

- a. more rigid
- b. darker in color
- c. lighter in color
- d. less rigid

54. The cuticle's job is to _____

- a. adhere the nail plate to the nail bed
- b. act as a protective barrier between the fingertip and the free edge
- c. produce the nail plate cells
- d. seal the space between the nail plate and living skin above it

55. Answering yes to which one of the following questions tells you that the tissue is the proximal nail fold, NOT the cuticle?

- a. Is the tissue any part of the skin that covers the nail plate and matrix?
- b. Is the tissue nonliving and not directly attached to living skin?
- c. Is the tissue adhered directly to the plate but removable with gentle scraping?
- d. Is the tissue very thin and colorless but easily visible under close inspection?

56. Which of the following is an infectious condition?

- a. onycholysis
- b. nail psoriasis
- c. tinea pedis
- d. skin psoriasis

57. What services can you offer a client with ingrown toenails? —

- a. no services
- b. a foot massage
- c. clear polish only
- d. a special pedicure

58. Fumes are:

- a. the liquid form of a solid
- b. a blend of soot like particles and vapors
- c. the same thing as vapors
- d. usually a result of freezing a liquid

59. The best way to ensure good adhesion of a nail enhancement product is to start with a _____ surface.

- a. roughed-up
- b. damp
- c. clean
- d. wet

60. Primers are MOST useful if the client has — nail plates.

- a. dry
- b. supple
- c. normal
- d. oily

61. Overfiling the nail will make it:

- a. excessively thick and smooth
- b. excessively thin and impermeable
- c. excessively thick and porous
- d. excessively thin and porous

62. Before applying a nail enhancement product, it is important to _____ the nail.

- a. rinse
- b. sterilize
- c. disinfect
- d. scrub

63. Manicuring is:

- a. the application and removal of nail polish
- b. the least popular service in the nail salon
- c. a basic skill that all cosmetologists are licensed to perform
- d. the art of caring for and beautifying the hands and nails

64. The list of services you are legally allowed to perform in your specialty in your state is known as your:

- a. price list
- b. scope of practice
- c. scope of business
- d. limited liability practice

65. Which of the following would NOT be an appropriate ventilation system for Kayla's salon?

- a. ventilated table with filters
- b. strong fans and open windows
- c. local-source-capture ventilation system
- d. portable downdraft vent machine

66. Which is the BEST dust mask for use in the salon?

- a. round, with a rating of N-95
- b. triangular, with a rating of N-95
- c. round, with a rating of P-100
- d. triangular, with a rating of P-100

67. When should a new set of gloves be used?

- a. every few hours
- b. for every client
- c. every day
- d. every week

68. When polishing the nails, a _____ is applied to prevent chipping and to give the nails a glossy, finished appearance.

- a. nail hardener
- b. top coat
- c. base coat
- d. third layer of colored polish

69. A pedicure includes all but which of the following:

- a. trimming and shaping the toenails
- b. treating a foot disease
- c. exfoliating skin
- d. a foot massage

70. It is recommended that you use a _____ to remove any loose debris from the nail plate during a pedicure.

- a. clipper
- b. nail nipper
- c. curette
- d. rasp

71. The act of causing tiny unseen openings in the skin that may let in pathogenic microbes is called:

- a. macrotrauma
- b. microtrauma
- c. follicle entry
- d. pore opening

72. Shaving the legs within 48 hours of receiving a pedicure can have what result?

- a. decreased circulation in the legs

- b. significant heat sensitivity
- c. exfoliating scrub not working effectively
- d. increased risk of irritation or infection

73. Friction should only be used on which part of the foot?

- a. the toes
- b. the top
- c. the bottom
- d. the sides

74. What is the power of the filing machine or its ability to keep turning when applying pressure during filing called?

- a. RPM
- b. torque
- c. vibration
- d. tolerance

75. Which of the following is true?

- a. As you press down, the machine speed decreases; as you reduce pressure, the speed increases.
- b. As you press down, the machine unlocks; as you reduce pressure, the machine locks.
- c. As you press down, the machine locks; as you reduce pressure, the machine unlocks.
- d. As you press down, the machine speed increases; as you reduce pressure, the speed decreases.

76. Which of the following can cause a cumulative trauma disorder for the nail technician?

- a. excessive heat
- b. overuse of the wrong bit
- c. a bit that wobbles
- d. excessive dust

77. It is recommended that you hold your handpiece like a:

- a. broom
- b. flashlight
- c. pencil
- d. spoon

78. Which of the following is a recommended way to avoid rings of fire?

- a. increase the speed of your machine
- b. keep the bit perpendicular to the nail as you work
- c. reduce the amount of pressure applied during filing
- d. increase the amount of pressure applied during filing

79. A nail technician who is adept at using a nail file is likely to avoid:

- a. uneven surface buffing
- b. precise maintenance procedures
- c. consistency with shaping
- d. decreased risk of strain on the hand, wrist, elbow, and shoulder

80. The two ways to create a nail extension are and

- a. tips; squovals
- b. tips; forms
- c. wraps; forms
- d. wraps; tips

81. Which is the best reasoning for why a dry manicure must be performed prior to nail tip application?

- a. It is not necessary for a dry manicure to be performed before a nail tip application; it is a special luxury service that can be added on.
- b. If any leftover nail polish is left on the nail, it will show through on the new extension.
- c. The client should be relaxed and enjoy the nail service, and a dry manicure helps to do that.
- d. Whatever is left on the nail will eventually lift, which will cause the tip to lift as well.

82. A _____ is placed under the free edge of the natural nail and is used as a guide to build a nail extension.

- a. nail form
- b. extender
- c. tip builder
- d. fiberglass shell

83. After removing the nail tip from the natural nail, it is recommended that you _____ to remove any adhesive residue.

- a. have the client wash their hands with soap and warm water
- b. gently buff the nail with a medium buffer
- c. immerse the nail in acetone polish remover
- d. gently buff the nail with a fine buffer

84. Which is TRUE of the length of nail extensions?

- a. The middle finger should be the longest nail.
- b. The nails on all five fingers should be the same length.
- c. The middle, index, and ring fingers should all be the same length.
- d. The index and middle finger nails should be the same length, and the pinky and ring finger nails should be the same length.

85. Which is NOT a scenario wherein nail resins are used?

- a. providing a dip systems color manicure
- b. extending the nails for special occasions
- c. permanently extending the nail
- d. repairing a crack in the natural nail

86. Which describes the relationship between viscosity and curing time when it comes to resins?

- a. Thick or thin viscosity resins are quick to cure.
- b. Cure time for all resins-thick or thin-tends to be about 48 hours.
- c. The thinner the viscosity, the faster cure time; the thicker the viscosity, the longer the cure time.
- d. The thicker the viscosity, the faster the cure time; the thinner the viscosity, the slower the cure time.

87. Any method of securing a layer of fabric on and around the nail tip is called a:

- a. fiberglass wrap
- b. nail wrap
- c. silk wrap
- d. nail tip adhesive

88. What is unique about dip systems?

- a. They can be used with liquid monomer
- b. They dry completely translucent and undetectable
- c. They can provide the client with an acrylic overlay and nail color all in one
- d. They do not require the use of a nail dehydrator.

89. A special additive designed to speed up chemical reactions is a/an:

- a. initiator
- b. BPO
- c. catalyst
- d. acrylic

90. Which of the following is a common initiator?

- a. nail dehydrator
- b. benzoyl peroxide
- c. acetone
- d. hydrogen peroxide

91. In general, _____ beads are the ideal mix ratio for working with monomer liquids and polymer powders.

- a. wet
- b. damp
- c. medium
- d. dry

92. What is the mix ratio for a wet bead?

- a. 1-1/2 parts monomer liquid to 1 part polymer powder
- b. 1 part monomer liquid to 1-1/2 parts polymer powder
- c. 1 part monomer liquid to 1 part polymer powder
- d. 2 parts monomer liquid to 1 part polymer powder

93. It is recommended that you use a _____ buffer for finish filing, refining, and buffing.

- a. coarse-grit
- b. medium-grit
- c. fine-grit

d. medium- to coarse grit

94. Which of the following is needed to perform a UV gel removal for a hard gel?

- a. soap and water
- b. alcohol
- c. electric file
- d. acetone

95. UV and LED bonding gels are used:

- a. to increase adhesion to the natural nail plate
- b. only to repair a crack
- c. in place of resin
- d. only when performing a maintenance service

96. Polymer gels:

- a. are a mixture of polymer powder and hard gels
- b. have a very thin viscosity
- c. are removed by soaking in acetone
- d. do not require standard nail prep

97. UV and LED gel nails differ from other types of enhancements in that after the nail plate is properly prepared, each layer of product applied to the natural nail, nail tip, or form requires:

- a. medium and fine buffing.
- b. exposure to UV or LED light curing
- c. another layer of dehydrator.
- d. repeat preparation.

98. How has nail art impacted the nail technology industry?

- a. It has increased revenues by expanding the service menus offered at salons.
- b. It has increased the amount of parasites that are transmitted from one client to another.
- c. It has allowed nail technicians to challenge state boards to expand their licenses.
- d. It has decreased the number of clients a nail technician can see in one day.

99. Which nail art technique involves creating a swirled effect with two or more colors?

- a. color blocking
- b. marbleizing
- c. color fading
- d. color graduation

100. When creating monomer liquid and polymer powder nail art, the perfect bead should be:

- a. oblong
- b. smooth
- c. rough
- d. dull

101. Once you have become a beauty and wellness professional, you should still never stop learning about your industry because _____

- a. the beauty and wellness industry never stops changing
- b. you will always be required to attend classes
- c. formal schooling will always be a part of your career
- d. throughout your career there will be tests and quizzes

102. Ethics are BEST defined as _____

- a. moral principles by which we live and work
- b. laws that regulate all industries
- c. posted rules and regulations at the workplace
- d. deep feelings common in all people

103. You will know that someone in your industry has exhibited unethical behavior if they _____

- a. conceal information about products in order to sell them
- b. price products below competitors to sell more
- c. stay open longer hours to attract more customers
- d. advertise their business aggressively to consumers

104. If you always provide skilled and competent service to your salon clients; are honest, courteous, and confidential; keep up with new techniques; and always give accurate information about the treatments and products you offer, you will always _____

- a. keep your self-esteem
- b. adhere to ethical practices
- c. realize your self-actualization
- d. adhere to your mission statement

105. Which one of the following is TRUE?

- a. Your personality is the sum of your attitudes and behavioral traits only.
- b. Your personality is the sum of your characteristics, attitudes and behavioral traits.
- c. Your personality is the sum of your characteristics and behavioral traits only.
- d. Your personality is the sum of your characteristics and attitudes only.

106. The practical steps for effectively communicating in the workplace include all EXCEPT which of the following?

- a. Be attentive
- b. React instead of responding.
- c. Talk less, listen more.
- d. Believe in yourself.

107. The service record card is all EXCEPT which of the following?

- a. It is intended for the client's use.
- b. It is the client's permanent progress record of services received
- c. It is updated with each client visit
- d. It is completed by the beauty and wellness professional performing the service.

108. As a beauty and wellness professional, what is the BEST first step to take toward helping your client to make choices that reflect a personal sense of style?

- a. Creating a 'client template'
- b. Consulting with your manager
- c. Doing a little research
- d. Speaking with the client

109. _____ are essential for building muscle and blood tissues and for repairing and replacing cells.

- a. Proteins
- b. Fats
- c. Carbohydrates
- d. Minerals

110. Which of the following is the human body's way of resisting and destroying pathogens and responding to infections?

- a. Immunity
- b. Tolerance
- c. Toxicity
- d. Safety

111. If you have received a vaccination for chicken pox, your immunity to chicken pox is said to be _____

- a. acquired
- b. toxic
- c. enhanced
- d. natural

112. Which of the following are BEST defined as hypersensitivity disorders of the immune system?

- a. Infections
- b. Viruses
- c. Bacteria
- d. Allergies

113. The BEST method of prevention for many of the bone and joint pains associated with being a beauty and wellness professional is _

- a. adequate hydration
- b. elbow sneezing
- c. allergy prevention
- d. proper ergonomics

114. _____ are the nutrients needed for energy to run every function within the body

- a. Carbohydrates
- b. vitamins

- c. proteins
 - d. fats
115. _____ destroys ALL microbial life
- a. Sanitization
 - b. Disinfection
 - c. Sterilization
 - d. Cleaning
116. _____ is more likely to be governed by federal regulatory agencies rather than state regulatory agencies.
- a. Sale of chemicals used on the job
 - b. Licensing for working on the job
 - c. Conduct on the job
 - d. Enforcement of job safety
117. Which of the following is TRUE of rules and regulations?
- a. They are also referred to as statutes
 - b. They are less specific than laws.
 - c. They are just the same as laws
 - d. They are more specific than laws.
118. It can be accurately said that pathogenic bacteria _____
- a. positively stimulate the immune system
 - b. keep the body healthy
 - c. help the body break down food
 - d. cause disease or infection
119. What is the presence of pus a sign of?
- a. Inflammation
 - b. Nonpathogenic organisms
 - c. Contagious disease
 - d. Bacterial infection
120. A disease that spreads from one person to another is ALWAYS _____
- a. nonpathogenic
 - b. systemic
 - c. deadly
 - d. communicable
121. If you get sick as a result of overexposure to chemicals at the workplace, what has happened?
- a. You have contracted an occupational disease.
 - b. You have contracted a pathogenic disease.
 - c. You have contracted a diagnosed disease.
 - d. You have contracted a parasitic disease.
122. Disease-causing microorganisms that are carried in the body by blood or body fluids, such as hepatitis and HIV, are called _____
- a. bloodborne viruses
 - b. systemic infections
 - c. bloodborne pathogens
 - d. mycobacteria
123. Which of the following is one of the two types of parasites commonly encountered in the salon and spa?
- a. Mycobacteria
 - b. HIV
 - c. Pediculous capitis
 - d. Pus
124. Which one of the following is TRUE?
- a. Sterilization destroys all microbial life except for spores
 - b. Sterilization is usually mandated in the beauty and wellness industry
 - c. Sterilization destroys all microbial life including spores
 - d. Sterilization is the first step in defense against the spread of disease.
125. What is the FIRST step in infection control?
- a. Elimination
 - b. Cleaning

- c. Sterilization
 - d. Disinfecting
126. Which of the following is the SECOND step of infection control?
- a. Sterilization
 - b. Elimination
 - c. Cleaning
 - d. Disinfecting
127. The process of disinfection eliminates _____
- a. a very small amount of microorganisms
 - b. most microorganisms
 - c. all microorganisms
 - d. no microorganisms
128. Disinfectants are NOT _____
- a. required to have an EPA registration number in order to be used in the salon or spa
 - b. harmful if absorbed through the skin
 - c. able to destroy all bacteria
 - d. pesticides
129. An EPA-registered disinfectant MUST carry all EXCEPT which of the following on its label?
- a. A registration number
 - b. Efficacy claims
 - c. A contact time
 - d. The word concentrate
130. Tuberculosis is transmitted through _____
- a. Inhalation
 - b. touching an infected object.
 - c. close contact with an infected person
 - d. direct transmission into the bloodstream
131. Which of the following is TRUE of phenolic disinfectants?
- a. The safest way to dispose of them is down the drain
 - b. They can be safely used on and applied to the skin
 - c. They have a very low pH
 - d. They are known carcinogens.
132. Which of the following is NOT one of the cautionary tips to consider when handling disinfectants?
- a. Avoid skin and eye contact
 - b. Use tongs to remove implements from disinfectants
 - c. Wear gloves and safety glasses
 - d. Use disinfectants directly on dirty, soft, porous surfaces
133. When handling disinfectants, NEVER _____
- a. place them in unmarked containers
 - b. mix them together, even with manufacturer's recommendations
 - c. add them to water to dilute them
 - d. use them on nonporous surfaces
134. Which of the following are guidelines published by the CDC that employees and employers agree to with the assumption that any human blood or body fluids are infectious?
- a. Sanitizers
 - b. Standard precautions
 - c. Exposure incidents
 - d. Antiseptics
135. Beauty and wellness professionals should change gloves _____
- a. after every single use
 - b. in between each client
 - c. after every other use
 - d. every single day
136. Which of the following is considered contact with non-intact (broken) skin, blood, body fluid, or other infectious materials that is the result of the performance of a worker's duties?
- a. Efficacy

- b. Exposure incident
- c. Standard precaution
- d. PPE

137. The effects of cosmetics and beauty products are based on how _____

- a. the body reacts to chemicals
- b. pleased the beauty and wellness professional is with the results
- c. friends and family members react to a new look
- d. favorably the new styles compare with the old

138. _____ is the simplest form of chemical matter

- a. A chemical
- b. A liquid
- c. An element
- d. A gas

139. There are _____ elements are known to science today

- a. 118
- b. 81
- c. 18
- d. 108

140. Of all the elements known to science today, _____ occur naturally on earth

- a. 89
- b. 18
- c. 98
- d. 19

141. Which of the following are defined as the basic units of matter?

- a. Atoms
- b. Neutrons
- c. Electrons
- d. Protons

142. _____ is an example of a compound molecule

- a. Pure nitrogen
- b. Common table salt
- c. The oxygen we breathe
- d. The ozone layer

143. _____ is an example of a compound molecule

- a. Ice melting to become water
- b. Water evaporating into the air
- c. Exposed metal rusting
- d. Liquid nail polish hardening

144. When salt is dissolved into water, _____.

- a. salt and water are both solvents
- b. salt is the solute and water is the solvent
- c. water is the solute and salt is the solvent
- d. salt and water are both solutes

145. All liquids are _____

- a. immiscible
- b. both miscible and immiscible
- c. miscible
- d. either miscible or immiscible

146. A solute is a _____

- a. stable physical mixture of two or more substances
- b. substance that is dissolved in a solution
- c. substance that dissolves a solvent and makes a solution
- d. liquid not capable of being mixed to form a stable solution

147. A solvent is any _____
- liquid not capable of being mixed to form a stable solution
 - substance dissolved into a solution
 - substance that dissolves a solute and makes a solution
 - stable physical mixture of two or more substances
148. Which of the following is TRUE of solutions?
- They are immiscible
 - They are usually a solid color
 - They are surfactants
 - They are stable mixtures
149. What is the overexposure principle used to describe?
- How overexposure determines safety
 - How overexposure determines toxicity
 - How overexposure determines tolerance
 - How overexposure determines immunity
150. SDSs are designed for _____
- use in an emergency
 - use only by new employees
 - everyday use
 - use only by managers
151. In the uniform order of the SDS, _____ comes immediately after the first category of "Identification"
- First-Aid Measures
 - Disposal Considerations
 - Hazard Identification
 - Toxicology Information
152. Electrical current is measured by _____
- watts
 - amperes
 - ohms
 - volts
153. Watts measure _____
- how much electrical energy is being used in one second
 - the strength of an electrical current
 - the pressure or force that pushes electrical current through a conductor
 - the resistance of an electrical current
154. What is a condition that prohibits certain treatments called?
- A contraindication
 - A conductor
 - A catalyst
 - A cathode
155. _____ light prompts the skin to produce beneficial vitamin D
- Ultraviolet
 - Galvanic
 - Infrared
 - Fluorescent
156. Which of the following is light therapy also known as?
- Radiotherapy
 - Phototherapy
 - Heat therapy
 - Laser therapy
157. All of the following are examples of soft skills, EXCEPT _____
- having good interpersonal skills
 - having a positive attitude
 - being punctual

- d. having good study habits
158. Start with _____, if you want to subtly increase the breadth and scope of your professional contacts.
- a. targeting
 - b. deductive reasoning
 - c. studying
 - d. networking
159. A resume is BEST defined as _____.
- a. a thorough, comprehensive, oral description of your education and work experience
 - b. an oral summary of a person's education and work experience
 - c. a written summary of a person's education and work experience
 - d. a thorough, comprehensive, written description of your education and work experience
160. If you are beginning a career as a beauty and wellness professional and have studied the industry and have a thorough understanding of what it is like on the job, you should:
- a. It will allow you to bypass the state board exam and move straight into your career.
 - b. It will help you to promote yourself and build a loyal client base.
 - c. It will guarantee you a job with high wages and good working conditions
 - d. It will automatically translate to a large number of loyal clients.
161. The first reality of a service position is that your career revolves around which of the following?
- a. Your clients
 - b. You
 - c. Your boss
 - d. The general public
162. If, as a beauty and wellness professional, you are regularly and successfully recommending and selling additional services to your clients, then you have most likely perfected the practice of _____.
- a. retailing
 - b. rebooking
 - c. ticket upgrading
 - d. public speaking
163. Which of the following are you doing if, as a beauty and wellness professional at a high-end salon, you always use the same nail conditioner on your client's nails and then, immediately after the treatment, always show the client a jar of the nail conditioner that is available for sale and take-home use?
- a. You are ticket upgrading
 - b. You are retailing
 - c. You are marketing
 - d. You are rebooking.
164. Being a person who always sees the glass as half full is one important way to be which of the following?
- a. Positive
 - b. Reliable
 - c. Professional
 - d. Respectful
165. What will you want to base your business location on?
- a. How many cars drive by per hour on average
 - b. Proximity to your home
 - c. Costs of rent, lease, and utilities
 - d. Your primary clientele and their needs

- d. Continuously change and alter your tipping policy

170. Adding services and retail sales to your service tickets means _____ for your business.

- a. additional revenue
- b. additional advertising
- c. additional risk
- d. additional clientele

171. Modern UV gel nail polish offers:

- a. longer nails
- b. a strong odor
- c. longer-lasting results
- d. a thicker application

172. Which job will be LEAST satisfying to a nail technician who enjoys training and educating others?

- a. distributor sales consultant
- b. manufacturer educator
- c. independent educator
- d. beauty school instructor

173. Specialize organs that remove certain elements from the blood to convert them into new compounds are called:

- a. venules
- b. glands
- c. vessels
- d. ventricles

174. Which gland plays a major role in sleep?

- a. pineal gland
- b. pancreas
- c. parathyroid gland
- d. adrenal gland

175. Which body system is LEAST important for the nail technician to understand?

- a. endocrine
- b. digestive
- c. reproductive
- d. integumentary

176. The cells of all living things are composed of:

- a. blood
- b. lymph
- c. protoplasm
- d. neurons

177. Myology is the study of the:

- a. bones
- b. skin
- c. human mind
- d. muscles

178. Bone is composed of about _____ minerals

- a. one-half

- b. one-third
- c. one-quarter
- d. two-thirds

179. Pressure in massage is usually directed from:

- a. origin to insertion
- b. belly to origin
- c. insertion to origin
- d. belly to insertion

180. Which of the following is NOT a muscle of the foot?

- a. abductor hallucis
- b. flexor digitorum brevis
- c. flexor digiti minimi
- d. serratus anterior

181. Blood supplies ___ to the skin.

- a. nutrients and alkali
- b. nutrients and oxygen
- c. oil and lymph
- d. oxygen and oil

182. The ___ is the clear, transparent layer just under the skin surface.

- a. stratum granulosum
- b. stratum germinativum
- c. stratum lucidum
- d. stratum corneum

183. The sebaceous glands are NOT found in which of the following parts of the body?

- a. head
- b. abdomen
- c. arms
- d. palms

184. What is the outermost layer of the skin?

- a. epidermis
- b. subcutaneous layer
- c. reticular layer
- d. dermis

185. The principal functions of the skin are sensation, heat regulation, excretion, absorption, secretion, and _____.

- a. support
- b. protection
- c. nourishment
- d. rehabilitation

186. What is NOT a characteristic of healthy skin?

- a. fine grained
- b. rigid
- c. flexible
- d. slightly moist

187. An ulcer is a/an _____.

- a. skin sore produced by scratching
- b. collection of blood trapped under the nail
- c. light-colored slightly raised mark on the skin
- d. open lesion on the skin

188. A _____ is a crack in the skin that penetrates the dermis

- a. crust
- b. scale
- c. fissure
- d. keloid

189. What does the B in the ABCDE cancer checklist stand for?

- a. breadth
- b. balance
- c. bulbous
- d. border irregularity

190. A _____ is a small, brownish spot or blemish on the skin, ranging in color from pale tan to brown or bluish black

- a. skin tag
- b. squamous cell carcinoma
- c. keratoma
- d. mole

191. Which of the following is the form of skin cancer?

- a. verruca
- b. anhidrosis
- c. melanoma
- d. eczema

192. Which is NOT true regarding skin inflammations?

- a. Psoriasis is caused by skin cells that turn over faster than normal.
- b. Cellulitis is highly contagious and can spread from one person to another very easily.
- c. Eczema is an inflammatory disease than can cause painful itching and is either acute or chronic
- d. Psoriasis can affect the nail plates, as well as the skin.
